Got 1st Place. 2011

Projects

SocialBook (React, Redux, Rails, SASS, PostgreSQL, Webpack, AWS S3)

- Normalized Redux state shape by giving each type it's own "slice" of state thus reducing complexity and duplication of information.
- Improved scalability through cloud image storage with AWS.
- Integrated news functionality which fetches news from News API.
- Utilized BCrypt to securely encrypt passwords for user authentication.

Saviors (HTML5 Canvas, Vanilla JavaScript, Firebase)

- Utilized vanilla JavaScript for overall structure and game logic.
- Incorporated HTML5 Canvas for fluid animation.
- Integrated FireBase JSON/NoSQL database for storing and retrieving users scores.

DomQuery (Vanilla JavaScript)

- Executed native DOM API which managed core manipulation of the DOM elements and event handling.

Employment

Don Karpov Films

NY, NY

Production Assistant

2016 to 2017

- Maintained general IT solutions such as Adobe Software Suit set up, plug in installations and firmware updates.
