Got 1st Place.

Temple University Japan
·
Asian Business Venture Competition   2011
Got 1st Place.

Projects

SocialBook
- Normalized Redux state shape by giving each type it's own "slice" of state thus reducing complexity and duplication of information.
- Improved scalability through cloud image storage with AWS.
- Integrated news functionality which fetches news from News API.
- Utilized BCrypt to securely encrypt passwords for user authentication.

Saviors
- Utilized vanilla JavaScript for overall structure and game logic.
- Incorporated HTML5 Canvas for fluid animation.
- Integrated FireBase JSON/NoSQL database for storing and retrieving users scores.

DomQuery
- Executed native DOM API which managed core manipulation of the DOM elements and event handling.

Employment

Don Karpov Films   NY, NY
Production Assistant   2016 to 2017
